

Javascript Specialist

6 years of experience • English Intermediate

During my professional career, I've been involved in a wide variety of different projects, starting from small teams and startups ending with established big companies. Mostly I would prefer to work with small teams, where we can move fast and I can use all my experience and knowledge. I am a full-stack engineer mostly experienced in Frontend Development, Javascript/React/Redux/Vuejs and backend, Nodejs/Typescript/Express.

Expertise Highlights:

- Created a few small applications from scratch.
- Launched a product with 50 000 + monthly users.
- Supported legacy codebases.

Tools • Libraries • Frameworks • Platforms

I always challenge myself with new technologies and languages.

In my day to day work, I prefer to use: Javascript (Vuejs, Vuetify, React, Webpack), Nodejs (Express, Koajs), Linux, Docker.
