

Python Specialist

5 years of experience · English Intermediate

I have more than 5 years of experience working in a different environment and different projects. Master degree in mathematics. I can quickly get acquainted and start using any of the technologies due to experience in different areas of programming and a strong fundamental background.

Expertise Highlights:

- Help the company to successfully migrate from legacy python codebase (version 2.6) to the newest - python 3.7 at that point.
- Prefer to use TDD when it's reasonable.
- Help to create and implement a microservice architecture.

Tools · Libraries · Frameworks · Platforms

Python (Flask, Django, aiohttp), RabbitMQ, Redis, REST API, AWS, Azure, Kubernetes, Spark, Redis, Linux, Docker.
